West Virginia Coal Facts at a Glance

Sources: Energy Information Agency Data and West Virginia Office of Miners' Health and Safety (expressed in short tons) All values expressed in tons except for dollar figures and employment. Discrepancies in the data are due to different reporting standards from the sources (eg. number of mines).

Total Production	117,518,279	Estimated Production Value 2013	\$7,746,422,200
Underground	86,148,225	Coal Severance Tax	\$490,000,000
Surface	31,370,054	Leading Coal Producing County	
Coal Companies Operating in WV	310	Total Tonnage - Marshall	15,575,805
Number of Mines	512	Underground - Marshall	15,575,805
Underground	269	Surface - Logan	5,475,925
Surface	243	Highest Employment by County - Boone	2,535
Record Production Year - 1997	181,914,000	County With Most Coal Reserves - Boone	3,589,414,636
Recoverable Coal Reserves	51,193,265,265	Largest Underground Mine	
West Virginia Coal Employment 2013	19,427	Marshall County Mine (Murray American Energy, Inc.)* ..	8,556,139
Underground	14,794	Largest Surface Mine	
Surface	4,633	Holden 22 Surface (Arch Coal)	2,592,436
Independent Contractors	29,000	Largest Mine Employment	
Coal Handling Facilities	2,050	Marshall County Mine (Marshall County Coal Co.)*	991
Total Employment	50,477	Largest Producing Mining Method	
Transportation (tons)	30,824	Underground	86,148,225
Rail	46,460,665	Largest Producing Coal Seam	
River	12,673,246	Pittsburgh	41,555,112
Truck	25,676,035		
Estimated Average Annual Coal Wage	\$68,500		

Note: Employment figures for Coal Handling Facilities are based on West Virginia Office of Miners' Health, Safety and Training Inspection Reports. Figures for Independent Contractors are based on either Monthly Reports, Inspection Reports, or information provided by the individual company on their permit application (or renewal) with this agency. Only these contractors with valid permits are included in the totals. Independent Contractors include companies providing the following types of services (not all categories are listed): Site Preparation, Construction, Electrical, Explosives, Vendors, Drainage, Maintenance, Trucking, Welding, Cleaning, Security, Painting, Drilling, Sampling and Demolition.

* Murray American Energy purchased the mine in December 2013 from Consolidation Coal Company.

Southern West Virginia's Future At Risk!

Alarming Statistics From 2008 → 2013:

Surface Coal Production
66M tons → 32M tons (52%)

Overall Coal Production
164M tons → 110M tons (33%)

The mining industry funds as much as 50% of governmental and educational programs for many Southern WV counties and they will not survive without this funding.

**Obama's EPA:
Striking at the
heart of the WV
Coalfields, attacking
the industry that
drives the economy
of Southern WV**

Southern WV is faced with a fight for survival. Many hard-working coal miners, their families, and all the jobs that depend on them are at **Risk!**

It is a fight none of us can afford to lose.

**Join the fight with me!
It affects ALL OF US**

Alliance has been serving the coal industry throughout West Virginia since 1975.

West Virginia Coal Production and Employment 1900-2013

Editor's Note: It is important to remember that the definition of "mining jobs" used to compile these employment figures has changed greatly since 1900. Until the late-1900s, coal companies maintained their own support staff, including everything from mechanics to construction workers, from machinists to supply clerks. While most of these jobs still exist, many roles have been turned over to mine service companies and are no longer counted as "mining jobs."

The most recent figures show only direct mining jobs. We believe a more accurate comparison of the "mining jobs" reported in the early-to-mid-1900s (which show 100,000 coal mining jobs in West Virginia alone) would be those numbers to the 60,000 direct and indirect jobs identified by the recent joint economic impact study conducted by West Virginia University and Marshall University College of Business.

The Coal Severance Tax

In 1987, West Virginia enacted a severance tax on coal. The tax amounts to 5% of the selling price of mined coal. Of this amount, the State retains 93%. The remaining 7% is apportioned among the State's 55 counties and its 228 incorporated municipalities.

Three-fourths of the 7% share is divided among the coal producing counties.

This money is distributed according to each county's production level.

The remaining quarter of the 7% is divided among all counties and municipalities, according to population.

Each county receives an additional share, based on the population of the unincorporated areas of the county.

The total severance tax collections for 2013 amounted to more than \$400 million.

A total of \$35.5 million was distributed to all counties and municipalities. Of this amount, \$27 million represented coal production in the 28 coal producing counties.

Wild and Wonderful ... West Virginia is Coal!

Millions of tons of high quality coal have been mined in these mountains and along this river. Clear evidence that coal mining can be done and still protect our environment.
